

Things we do in our core day to day business:

Engineering Support and Problem Solving
Component Design and Analysis
Engineering and Manufacturing Drawing Services
Component and Product Fabrication
Prototype, Customisation and Component Manufacturing
Mechanical Testing and Failure Analysis
Engineering Inspections and Reporting
Inventor and Innovation Mentoring and Advice
Motorsport Component Design and Fabrication

Where we are: Based in The Oaks since 2006, Perusic Engineering works with clients across Sydney, the Illawarra, and the Southern Highlands on local, national and international projects.

How did we get here: Qualified in Mechanical Engineering and over 20 years of experience in construction and design, failure analysis, manufacturing design, and fabrication has seen Perusic Engineering successfully work on a range of local and international projects in manufacturing, mining, defence, motorsport and construction. Recognising the need of small to medium businesses for quality engineering services to contribute to their growth and success, Perusic Engineering focuses on working with businesses on their projects, manufacturing, and design engineering in all areas of their operations.

What we do: We deliver design, analysis and fabrication for businesses that require mechanical engineering solutions. Our engineering skills and capabilities assist businesses that are designing products, components, and manufacturing processes, analysing and rectifying component or design failures, and improving mechanical systems. We are able to work with clients on project stages on projects from inception to completion and have a strong record on building successful relationships with businesses in manufacturing, innovation, engineering, motorsport and construction. We possess a wide range of mechanical engineering capabilities and welcome anyone requiring engineering advice to contact us to discuss how we can help.

Our Unique selling point is: Perusic Engineering provides specialist engineering advice and capabilities for businesses requiring quality-focused engineering solutions. Our extensive experience, knowledge and passion for innovation ensure we can deliver businesses' improved reliability, performance and processes in their products, components and designs.

Our Motto is: "Our Experience is your Success"

An ideal referral is: Any business or individual seeking engineering advice or solutions including component design and fabrication, work overload, project and system design, failure analysis, and manufacturing process design.
